

Irvine, CA (June 25, 2012) - International Polymer Solutions (IPS) Inc.
.....

International Polymer Solutions (IPS) is proud to announce the hiring of Gary Poremski as Regional Sales Manager – East Coast.

Gary's sales experience in the fluid power and electronics industries, with companies such as Penn-Air & Hydraulics and Pioneer Standard Electronics, have prepared him to help IPS grow its customer and distribution base, both domestically and internationally. His strengths in territory management and relationship development will be a great asset to the organization, and will be crucial to maintaining and fostering IPS customers.

"I believe International Polymer Solutions is in a very good position for growth for many years to come," said Gary. "One of the reasons I chose to join IPS is their ability to manufacture products to customer specifications. You just don't see that in the marketplace today. Most manufacturers expect their customers to build to their specs. Not at IPS!"

International Polymer Solutions is a manufacturer of High-Purity Fluid Handling Solutions for both standard and custom industrial applications. The company, the result of a merger between TEQCOM Industries and BECO Manufacturing, is located in Irvine, California.
